Recent Work Experiences

Concrete

Android Developer

May / 2017 – Current

I'm working on apps for entertainment, news, and m-commerce, for big market players. My role is not only develop apps, but work together with the UX and QA professionals to ensure a good UI/UX for the apps, making decisions to hit a great experience, trying to get some Material Design concepts as a base for our work.

Prime Systems

Mobile Developer

March / 2016 – May /2017

I was responsible for the evolution and maintenance of mobile applications developed by the company. I worked with Android, Swift and C# development. I rewrote our biggest application for the Swift and C# platforms.
